**DETAILED ACTION**

1. This office action is in response to the Application 10/608,155 filed 06/03/2003.

2. Claims 1-23 are pending in the Application.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a method of a failure analysis of the chip, classified in class 716, subclass 4.
- II. Claims 17-23, drawn to a method of manufacturing for a semiconductor device, classified in class 438, subclass 14+.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a method of a failure analysis of the chip as claimed in the Group I does not require a method of a failure analysis of the chip as claimed in the Group II and vice versa a method of a failure analysis of the chip as claimed in the Group II does not require a method of a failure analysis of the chip as claimed in the Group I. The subcombination has separate

utility such as manufacturing method for a semiconductor device including fabricating of integrated circuits.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Surinder Sachar (Registration No. 34,423) on 07/07/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen Rossoshek whose telephone number is 571-272-1905. The examiner can normally be reached on 7:00-4:00.
